

1 **Appendix I.** List of articles that deal directly with the effects of landscape changes on pollinators and
2 pollination services selected for analysis (July 2011) (n=219)

3 Aguilar R, Ashworth L, Galetto L, Aizen MA (2006) Plant reproductive susceptibility to habitat
4 fragmentation: review and synthesis through a meta-analysis. *Ecology Letters* 9:968-980.

5 Aguirre A, Dirzo R (2008) Effects of fragmentation on pollinator abundance and fruit set of an abundant
6 understory palm in a Mexican tropical forest. *Biological Conservation* 141:375-384.

7 Ahrné K, Bengtsson J, Elmqvist T (2009) Bumble Bees (*Bombus* spp) along a gradient of increasing
8 urbanization. *PLOS ONE* 4:e5574.

9 Aizen MA, Feinsinger P (1994a) Forest fragmentation pollination and plant reproduction in a Chaco Dry
10 Forest Argentina. *Ecology* 75:330-351.

11 Aizen MA, Feinsinger P (1994b) Habitat fragmentation native insect pollinators and feral honey bees in
12 Argentine Chaco Serrano. *Ecological Applications* 4:378-392.

13 Aizen MA, Ashworth L, Galetto L (2002) Reproductive success in fragmented habitats: do compatibility
14 systems and pollination specialization matter? *Journal of Vegetation Science* 13:885-892.

15 Aizen MA, Garibaldi LA, Cunningham SA, Klein AM (2008) Long-term global trends in crop yield and
16 production reveal no current pollination shortage but increasing pollinator dependency. *Current Biology*
17 18:1572-1575.

18 Aizen MA, Garibaldi LA, Cunningham SA, Klein AM (2009) How much does agriculture depend on
19 pollinators? Lessons from long-term trends in crop production *Annals of Botany* 103:2005-2010

20 Albrecht M, Duelli P, Müller C, Kleijn D, Schmid B (2007) The Swiss agri-environment scheme enhances
21 pollinator diversity and plant reproductive success in nearby intensively managed farmland. *Journal of*
22 *Applied Ecology* 44:813-822.

23 Andersson E, Barthel S, Ahrné K (2007) Measuring social–ecological dynamics behind the generation of
24 ecosystem services. *Ecological Applications* 17:1267-1278.

25 Artz DR, Waddington KD (2006) The effects of neighbouring tree islands on pollinator density and diversity
26 and on pollination of a wet prairie species *Asclepias lanceolata* (Apocynaceae). *Journal of Ecology*
27 94:597–608.

28 Aschero V, Vazquez DP (2009) Habitat protection cattle grazing and density-dependent reproduction in a
29 desert tree. *Austral Ecology* 34:901-907.

30 Ashworth L, Aguilar R, Galetto L, Aizen MA (2004) Why do pollination generalist and specialist plant
31 species show similar reproductive susceptibility to habitat fragmentation? *Journal of Ecology* 92:717-
32 719.

33 Barlow J, Gardner TA, Araujo IS, Vila-Pires TCA, Bonaldo AB, Costa JE, Esposito MC, Ferreira LV, Hawes
34 J, Hernandez MIM, Hoogmoed MS, Leite RN, Lo-Man-Hung NF, Malcolm JR, Martins MB, Mestre
35 LAM, Miranda-Santos R, Nunes-Gutjahr AL, Overal WL, Parry L, Peters SL, Ribeiro-Junior MA, Silva
36 MNF, Silva Motta C, Peres CA (2007) Quantifying the biodiversity value of tropical primary secondary
37 and plantation forests. *Proceedings of the National Academy of Sciences of the United States of*
38 *America* 104:18555-18560.

39 Bartomeus I, Vila M, Steffan-Dewenter I (2010) Combined effects of *Impatiens glandulifera* invasion and
40 landscape structure on native plant pollination. *Journal of Ecology* 98:440-450.

41 Belfrage K, Bjorklund J, Salomonsson L (2005) The effects of farm size and organic farming on diversity of
42 birds pollinators and plants in a Swedish landscape. *Ambio* 34:582-588.

43 Bernard E, Fenton MB (2007) Bats in a fragmented landscape: species composition diversity and habitat
44 interactions in savannas of Santarém Central Amazonia Brazil. *Biological Conservation* 134:332-343.

45 Bhagwat SA, Willis KJ, Birks HJB, Whittaker RJ (2008) Agroforestry: a refuge for tropical biodiversity?
46 *Trends in Ecology Evolution* 23:261-267.

47 Biesmeijer JC, Roberts SPM, Reemer M, Ohlemuller R, Edwards M, Peeters T, Schaffers AP, Potts SG,
48 Kleukers R, Thomas CD, Settele J, Kunin WE (2006) Plants in Britain and the Netherlands parallel
49 declines in pollinators and insect-pollinated. *Science* 313:351-354.

50 Bittencourt JVM, Sebbenn AM (2007) Patterns of pollen and seed dispersal in a small fragmented population
51 of the wind-pollinated tree *Araucaria angustifolia* in southern Brazil. *Heredity* 99:580-591.

52 Bjerknes A, Totland O, Hegland SJ, Nielsen A (2007) Do alien plant invasions really affect pollination
53 success in native plant species? *Biological Conservation* 138:1-12.

54 Borges LA, Sobrinho MS, Lopes AV (2009) Phenology pollination and breeding system of the threatened tree
55 *Caesalpinia echinata* Lam (Fabaceae) and a review of studies on the reproductive biology in the genus.
56 *Flora* 204:111-130.

57 Brittain C, Bommarco R, Vighi M, Settele J, Potts SG (2010) Organic farming in isolated landscapes does not
58 benefit flower-visiting insects and pollination. *Biological Conservation* 143:1860-1867.

59 Brosi BJ (2009) The effects of forest fragmentation on euglossine bee communities (Hymenoptera: Apidae:
60 Euglossini) *Biological Conservation* 142:414-423.

61 Brosi BJ, Daily GC, Ehrlich PR (2007) Bee community shifts with landscape context in a tropical countryside.
62 *Ecological Applications* 17:418-430.

63 Brosi BJ, Daily GC, Chamberlain CP, Mills M (2009) Detecting changes in habitat-scale bee foraging in a
64 tropical fragmented landscape using stable isotopes. *Forest Ecology and Management* 258:1846-1855.

65 Brosi BJ, Daily GC, Shih TM, Oviedo F, Durán G (2008) The effects of forest fragmentation on bee
66 communities in tropical countryside. *Journal of Applied Ecology* 45:773-783.

67 Brown MJF, Paxton RJ (2009) The conservation of bees: a global perspective. *Apidologie* 40:410-416.

68 Brys R, Jacquemyn H, Endels P, Rossum FV, Hermy M, Triest L, Bruyn L, Blust GDE (2004) Reduced
69 reproductive success in small populations of the self-incompatible *Primula vulgaris*. *Journal of Ecology*
70 92:5-14.

71 Burgess VJ, Kelly D, Robertson AW, Ladley JJ (2006) Positive effects of forest edges on plant reproduction:
72 literature review and a case study of bee visitation to flowers of *Peraxilla tetrapetala* (Loranthaceae)
73 New Zealand. *Journal of Ecology* 30:179-190.

74 Buschbom J, Yanbaev Y, Degen B (2011) Efficient long-distance gene flow into an isolated relict oak stand.
75 *The Journal of heredity* 102:464-472.

76 Bustamante RO, Castor C (1998) The decline of an endangered temperate ecosystem: the rui (*Nothofagus*
77 *alessandrii*) forest in central Chile. *Biodiversity and Conservation* 7:1607-1626.

78 Cane JH, Tepedino VJ (2001) Causes and extent of declines among native North American invertebrate
79 pollinators: detection evidence and consequences. *Conservation Ecology* 5(1):1.

80 Cane JH, Minckley RL, Kervin LJ, Roulston TH, Williams NM (2006) Complex Responses within a desert
81 bee guild (Hymenoptera: Apiformes) to urban habitat fragmentation. *Ecological Applications* 16:632-
82 644.

83 Carre G, Roche P, Chifflet R, Morison N, Bommarco R, Harrison-Cripps J, Krewenka K, Potts SG, Roberts
84 SPM, Rodet G, Settele J, Steffan-Dewenter I, Szentgyogyi H, Tscheulin T, Westphal C, Woyciechowski
85 M, Vaissiere BE (2009) Landscape context and habitat type as drivers of bee diversity in European
86 annual crops. *Agriculture Ecosystems and Environment* 133:40-47.

87 Carvalho LG, Seymour CL, Veldtman R, Nicolson SW (2010) Pollination services decline with distance
88 from natural habitat even in biodiversity-rich areas. *Journal of Applied Ecology* 47:810-820.

89 Carvalho LG, Veldtman R, Shenkute AG, Tesfay GB, Pirk CWW, Donaldson JS, Nicolson SW (2011)
90 Natural and within-farmland biodiversity enhances crop productivity. *Ecology letters* 14:251-259.

91 Carvell C, Roy DB, Smart SM, Pywell RF, Preston CD, Goulson D (2006) Declines in forage availability for
92 bumblebees at a national scale. *Biological Conservation* 132:481-489.

93 Carvell C, Meek WR, Pywell RF, Goulson D, Nowakowski M (2007) Comparing the efficacy of agri-
94 environment schemes to enhance bumble bee abundance and diversity on arable field margins. *Journal*
95 *of Applied Ecology* 44:29- 40.

96 Chacoff NP, Aizen MA (2006) Edge effects on flower-visiting insects in grapefruit plantations bordering
97 premontane subtropical forest. *Journal of Applied Ecology* 43:18-27.

98 Chapman RE, Wang J, Bourke AFG (2003) Genetic analysis of spatial foraging patterns and resource sharing
99 in bumble bee pollinators. *Molecular Ecology* 12:2801- 2808.

100 Cheesman OD (1998) The impact of some field boundary management practices on the development of
101 *Dipsacus fullonum* L flowering stems and implications for conservation. *Agriculture Ecosystems and*
102 *Environment* 68:41-49.

103 Chifflet R, Klein, EK, Lavigne C, Violette LF, Ricroch AE, Lecomte J, Vaissiere BE (2011) Spatial scale of
104 insect-mediated pollen dispersal in oilseed rape in an open agricultural landscape. *Journal of Applied*
105 *Ecology* 48:689-696.

106 Corlett RT (2001) Pollination in a degraded tropical landscape: a Hong Kong case study. *Journal of Tropical*
107 *Ecology* 17:155-161.

108 Cortés-Delgado N, Pérez-Torres J (2011) Habitat edge context and the distribution of phyllostomid bats in the
109 Andean forest and anthropogenic matrix in the Central Andes of Colombia. *Biodiversity and*
110 *Conservation* 20:987-999.

111 Cruz-Neto O, Machado IC, Duarte JA, Lopes AV (2011) Synchronous phenology of hawkmoths (Sphingidae)
112 and Inga species (Fabaceae–Mimosoideae): implications for the restoration of the Atlantic forest of
113 northeastern Brazil. *Biodiversity and Conservation* 20:751-765.

114 Cussans J, Goulson D, Sanderson R, Goffe L, Darvill B, Osborne JL (2010) Two bee-pollinated plant species
115 show higher seed production when grown in gardens compared to arable farmland. *PloS ONE* 5:e11753.

116 Darvill B, Knight ME, Goulson D (2004) Use of genetic markers to quantify bumblebee foraging range and
117 nest density. *Oikos* 107:471-478.

118 Darvill B, Ellis JS, Lye GC, Glouson D (2006) Population structure and inbreeding in a rare and declining
119 bumblebee *Bombus muscorum* (Hymenoptera: Apidae). *Molecular Ecology* 15:601–611.

120 Dauber J, Biesmeijer JC, Gabriel D, Kunin WE, Lamborn E, Meyer B, Nielsen A, Potts SG, Roberts SPM,
121 Sober V, Settele J, Steffan-Dewenter I, Stout JC, Teder T, Tscheulin T, Vivarelli D, Petanidou T (2010)
122 Effects of patch size and density on flower visitation and seed set of wild plants: a pan-European
123 approach. *Journal of Ecology* 98:188-196.

124 Davis ES, Murray TE, Fitzpatrick U, Brown MJF, Paxton RJ (2010) Landscape effects on extremely
125 fragmented populations of a rare solitary bee *Colletes floralis*. *Molecular ecology* 19:4922-4935.

126 Dawson IK, Vinceti B, Weber JC, Neufeldt H, Russell J, Lengkeek AG, Kalinganire A, Kindt R, Lillesø JPB,
127 Roshetko J, Jamnadass R (2011) Climate change and tree genetic resource management: maintaining
128 and enhancing the productivity and value of smallholder tropical agroforestry landscapes. A review.
129 *Agroforestry Systems* 81:67-78.
